NUTRITION FOR THE 24-HOUR ATHLETE

CR7 DRIVE
PRODUCT COMPARISON

WHAT CR7 DRIVE IS:

CR7 Drive is a contemporary take on a traditional sports drink, without any artificial flavours or sweeteners, so it isn't overly sweet. Light tasting and refreshing, it is designed to provide people with components necessary for performance: rapid energy to fuel you during workouts and enhanced hydration with 320 mg vital electrolytes lost during exercise. With 50 calories per scoop mixed with 250 ml of water, it's great for a range of activities: like soccer, fitness routines, running or jogging, or anything else that gets your heart rate up and sweat going.

CR7 Drive contains a high glucose:fructose ratio to ensure you are rapidly fueled for peak performance. It combines carbohydrates with electrolytes for maintaining endurance performance. Its targeted spectrum of vital electrolytes includes: 135 mg sodium, 125 mg potassium and 60 mg magnesium to help enhance hydration. CR7 Drive uses soluble forms of minerals such as magnesium citrate, sodium citrate and potassium phosphate.

NUTRITION FACTS:

Serving size: 1 scoop (13.5 g)

Amount per Serving:

Calories: 50

Total Carb: 12 g

Sugars: 9 g

Sodium: 135 mg

Potassium: 125 mg
